“ I was delighted with your workshop which has both quality and depth. The combination of your depth of knowledge, presentation skills, and the delightful game made the experience safe, enlightening, and most important, change-enabling. The experience is both easy and fun. We know that experiential learning has the most likely chance of changing behavior over the long term, and the extended value is in the likelihood of the experience “sticking”. Business, education, and government need to engage the new learnings you offer through your program.
