#### - Realmark WA

Shannan is an exceptional public speaker and after quizzing me in the short time we had before he was due on, adapted his presentation to suit the audience and what we are trying to accomplish here with our weight loss challenge and the challenges that residents face being in such an isolated location ... Shannan's upbeat nature and passion for health and fitness showed through every word and residents left inspired not only to continue on with their weight loss journey but also to have a more positive outlook and to quote the man himself, "not sweat the small stuff.
