

Andrew King

Engineer, Teacher and Author

Andrew is a chemical and environmental engineer with experience spanning industry, consulting, and government. He has been an active member of the Sustainable Engineering Society and is passionate about the role engineering plays in building a sustainable future.

Much of Andrew's career has focused on the energy and water sectors, including environmental management in the coal seam gas industry, where he also took on management secondments. Since completing his PhD, he has continued to maintain a strong interest in natural wastewater treatment systems.

Alongside his engineering career, Andrew is the author of the much-loved children's picture books Engibear's Dream, Engibear's Bridge, and Engilina's Trains—stories that bring engineering to life for young readers. He is also a dedicated teacher, currently teaching secondary mathematics and science.
