### **More about Nigel Collin:**

Nigel Collin started his first business at the age of 20 and sold it at 21. He went on to build one of Australia's largest creative entertainment design companies within the business events arena.

In 2013, armed with a video camera, Nigel set off solo on his motorbike, to discover ingenious Australians and share their stories. This resulted in the 'Ingenious Oz Project' through which he was able to analyse, over many years, 100s of people and businesses to identify patterns in what they did and how they did it to achieve success. The learnings from this research became the basis of Nigel Collin's 'Game of Inches' process which he teaches to individuals and organisations around the world today.

Nigel has presented to organisations in industries including IT, Franchise, Events, Marketing, Finance, Pharmaceuticals, Government and Telecommunications. He has an impressive track record working with some of the world's leading executives, Ministers of Parliament and entrepreneurs in both public and private sectors.

Nigel is an alumnus of the Disney Institute, a Ted-Xer, and the author of three books. In 2017, he became the only speaker in Australia to be recognised for his outstanding contribution to meetings and events.

When not speaking, working with clients, writing or riding his motorcycle, Nigel Collin spends his

time between Sydney and the rural mid north coast of NSW with his family.
